

Bay Sewer Update #2

Construction continues the Bay Sewer Project in downtown Bigfork. The Contractor has two crews working on the project in an attempt to reduce the duration of the disruption. **Electric Avenue is open to traffic and businesses**, but vehicles must turn around at the intersection of Bridge Street (near Pure West Real Estate). Bridge Street to Mill Street is open, but access is restricted to local traffic only.

Phase 1 of the project is scheduled for completion by May 28, 2021 and is on schedule. There will be no construction activities during June, July, and August. Phase 2 of the project is scheduled to resume at the first part of September and run through the fall.
